

***Dear Online Banking Customer***

You may notice a change in the look and feel of our Online Banking site when you sign on after July 19, 2010. That's because we are continuing to provide enhancements to make your Online Banking experience better than ever.

***If you're a current Online Banking customer, when you first sign on, click "Registered Internet Banking User" on the first screen you see. Your security key, password and sign-on procedure remain the same.***

**Here are the key features of the upgrade.** *You may want to print this page as a reminder of what our new Online Banking services can provide.*

- **Locked out of Online Banking? Now you can reset your very own Online Banking password, 24/7.**  
(Click "Options", then "Change Password")
- **Create a "short cut" to your Online Banking home page by creating an icon on your computer desktop.**  
(Click "Options", then "Download Security Key Login")
- **Reorder checks directly from your Online Banking screen.**  
(Click on "Accounts", then "Check Reorder")
- **Change the design and colors of your Online Banking screens.**  
(Click on "Options", then "Color Settings")

We hope you find these enhancements helpful. If you have any questions regarding the upgraded Online Banking site, please contact us, Monday through Friday, 9 a.m. – 5 p.m. and Saturday, 9-noon, at (203) 972-3838.
